Andrei Miroslav

Infrastructure Consultant at Lidl România
Amsterdam

Rezumat

I am a person who is passionate about technology and electronics. I really like to learn new things and to discover new opportunities for technology development, even at home. Recently, I started to develop my own NAS, using an old PC and the internal network in my apartment in order to facilitate access to my documents from anywhere with the help of my little friend, Raspberry PI 3.

Professionally, I like to be involved in the development activities of the company. Therefore, I opened a warehouse and a Head Office. Also, I have coordinated a Windows 10 National Rollout project for approximately 1500 stations.

I am an active person, always learning and eager to keep up with all updates of the software and equipment that I use in my everyday work.

On my spare time, I enjoy listening to country music and watching American Football games.

Experiență

Lidl România

3 ani 8 luni

Miroslav Ionut Andrei PFA

IT Consultant

februarie 2017 - februarie 2020 (3 ani 1 lună)

Bucharest, Romania

IT maintenance services include technical assistance, pre-arranged or ondemand, whenever necessary.

I provide IT maintenance for computers, servers and computer networks based on monthly subscription or on-demand. To create the right subscription for each customer, an analysis of the entire computer system is required. Based on the analysis, the required maintenance subscription is established for you.

IT maintenance ensures an optimal level of functionality of the equipment.

IT hardware maintenance services:

- Diagnosing and repairing hardware failures;
- Installing new components and checking their compatibility;
- Internal cleaning of computer dust to prevent malfunctions;
- Installation of peripheral equipment;
- Hardware testing.

IT software maintenance services:

Installation and configuration of any software package - operating systems or applications. I provide both open source and licensed solutions.

Vivre DECO

4 ani 2 luni
